FLEXPak 3000 (FULL-SIZE)

A fully operational drive for effective sales and training demonstrations

The FlexPak 3000 demonstrator is a complete, fully operational 5 HP regenerative drive mounted on a sturdy display stand for easy demonstration. The unit simply plugs in to single-phase 115 VAC power to allow you to show the powerful and user-friendly operator interface module (OIM).

With this demonstrator, you will be able to easily show the various run, monitor, and diagnostic displays. The FlexPak 3000 demonstrator unit is ideal for demonstrating to customers or plant personnel the “quick start” sequence and other menu items. It can display drive diagnostics and context-sensitive help screens in five languages.

If a motor and appropriate three-phase 230 VAC power are available, a simple activation of a switch will allow you to perform a complete operational demonstration. By simply answering the “quick start” prompts, you will be able to start the drive. You can also demonstrate the self-tuning capability of the drive and control and adjust the drive directly from the OIM. Or, if you have a customer’s operator station available, you can easily wire it in for remote control of the drive. The unique design of the FlexPak 3000 interface lets you monitor speed and load in user-settable units.

The FlexPak 3000 demonstrator ships in a rugged carrying case to protect the unit. An instruction manual and a laminated display placard identifying the key product features are also included.

Model Number D1FP3001 \$4,400 List

A regulator and OIM module mounted in a carrying case provides easy portability for sales and training demonstrations.

The unit simply plugs in to single-phase 115 VAC power to allow you to show off the powerful and user-friendly operator interface module (OIM).

With this demonstrator, you will be able to easily show the various run, monitor, and diagnostic displays. The FlexPak 3000 demonstrator unit is ideal for demonstrating to customers or plant personnel the “quick start” sequence and other menu items.
