

Appendix L

New Features in This Release

Version 4.1 of the AutoMax Programming Executive contains the following new features:

1. Support for the AutoMax PC3000.
2. Support for the Remote I/O Head (M/N 57C328), which is similar to M/N 57C330. M/N 57C328 allows you to mix inputs and outputs on the same rail.
3. Support for the 115 VAC Input module (M/N 61C501) and 24 VAC/DC Input module (M/N 61C516), which are identical to, and use the same Variable Configurator forms as, M/N 61C500 and M/N 61C515, respectively.
4. Print Setup has been revised to allow the user to select the non-proportional font to be used for printouts.
5. Support for the Kermit communications software utility has been discontinued.
